COMPLETE SPECIFICATION.

"NEW HETEROCYCLIC COMPOUNDS."

The following statement is a full description of this invention, including the best method of performing it known to us :-

This invention relates to new heterocyclic compounds and more particularly it relates to new 2-thiohydantoin compounds which we have found to possess valuable anticonvulsant properties.

According to the invention we provide the said new 2-thiohydantoin compounds of the formula :-

wherein R₁ and R₂ stand for alkyl radicals or they may optionally be joined together to form, together with the adjacent carbon atom, a polymethylene ring and wherein R₃ stands for an aryl group which may optionally bear substituents.

As examples of R₁ and R₂ there may be mentioned for example

5. - 13/11/58. - 95.
